## Student of the Week

**By: Christina Pugh**

Hi! I am the student of the week and I would like to tell you about it.

Being the student of the week is **really** fun! You can chew gum, bring your pet and other special things in, and the best part (I think) is bringing in pictures of yourself and your family.

The gum comes straight from Mr. G's pocket. I might bring in my cat named Sox. I also might bring in my casts from when I broke my arm last year. I brought in pictures out of my photo album.

I like being student of the week and I hope you do too!

## Thanksgiving

**By: Felicia Nelson**

My news topic this week is to inform my classmates where we are all going for Thansgiving.

Twelve of my classmates are going to their mom's house, including Mr. G. Ten people are going to their grandparents. I'm also going to my grandma Pat's. She lives in Algonquin. Two people are going to Kentucky and two people are going to their aunt's and uncle's.

I hope everyone travels safe and has a **Happy Thanksgiving!**

## **Wrestling Fundraiser**

**For the fundraiser this year we are selling spirit brax cups.**

**You can't buy only one though; you have to buy four for fifteen dollars. I think the cups are better than popcorn. We are selling all of the college football teams and N.F.L baseball and Military cups. If you want to buy one you can send your kid in with money and we stop selling Tuesday Nov. 26<sup>th</sup>. I hope a lot of people buy them because I want new uniforms. You can also call my Mom 815-714-1861.**

## **Science of the Pollution**

**In science we are learning about pollution. Pollution is littering, like putting out dangerous chemicals into the air and water plus not recycling. We all need to start to not pollute by going green and being more responsible for our environment. Some things that we can do at home are unplugging electrical appliances and chargers. Recycle everything that is recyclable. Recycling and not polluting is important to our environment.**
